## Fairlawn Gladiolus Gardens

C. L. GOODRICH, Proprietor

R. F. D. No. 3

Madrid, Iowa

# Terms

Cash with order or 25% will hold the order until spring when the balance may be sent before shipment. No order accepted for less than \$1.00. All bulbs postpaid at prices quoted.

I use great care in filling orders but mistakes occur and they get mixed sometimes. If you find any not true to name when they bloom I will replace them.

## Cultural Directions

Plant in good garden soil, in full sunshine if possible; in most soils three to four inches is best depth for large bulbs, smaller bulbs a little less, and about two inches for very small bulbs and bulblets. Plant about May 1st, about four inches apart in the row, cultivate after every rain as soon as the ground is dry enough to work good, and cultivate every ten days anyway to keep the soil fine.

Cut spike as soon as the first flower opens and let them bloom in the house in water. Leave plenty of foliage to insure a good strong bulb for next season. Dig any time after the middle of September and leave them in shallow trays in the sun or a well ventilated room until dry enough to store in a cool dry place safe from frost.

## Explanation

L—large, more than one inch in diameter. S—small, from one-half to three-quarters inch and B—bulblets.

The 25 varieties indicated by a star are the ones that won 1st place in the 12 and 25 best named variety class at Des Moines, Iowa. Catalogue value \$6.55—one each for \$5.50, one inch or more. Half size, about three-quarters inch, \$3.00.

## Just a Few Words for the Fairlawn Glads. from Other Glad Growers:

MR. WM. V. HALL, New Zealand. Your varieties have done splendidly here. I think your flowers can stand in any company and do you credit. The one I fell most in love with was Olive Goodrich. It is a bewitching thing and I shall look forward with keen expectancy to seeing it again next year.

W. G. BOWEN, Mich. With this order I will have most of your originations. I have never discarded but one variety, and that is more than I can say for other originators.

H. E. MORROW, Iowa. I was more than pleased with the fine flowers I had from you last year. Olive Goodrich, Dr. Hansen, Lewis Dingman and in fact every variety was superb. Olive Goodrich took my eye above almost everything I raised.

E. F. BESSEY, Iowa, who is making a specialty of early varieties, says of Dr. A. C. Hansen, of over fifty early varieties, it was the first to bloom and was my choice of all of them.

# Fairlawn Originations

FEW EQUAL

NONE BETTER

The Fairlawn Originations won out again at the Iowa Gladiolus Show at Des Moines, Iowa, August 4th, getting first premium for both 12 and 25 best named varieties and Mrs. C. M. Vosburg again carried off first as best pink.
